VUNYX®
Windshield Safety Film

Vunyx® Windshield Safety Film is a high-clarity protective film designed to reinforce your windshield against impact while maintaining full visibility. Built specifically to meet windshield clarity requirements, it strengthens the glass without altering its factory-clear appearance.

The film adds a critical layer of impact resistance, helping reduce shattering and keeping the driver safe from flying debris. With 90% visible light transmission and zero color distortion, it preserves clear vision in all conditions, while its UV and infrared rejection properties improve cabin comfort and help protect against sun damage.
